

Sushant Kumar

Full Stack Engineer

Bengaluru, India | +91-9064005890 | 000sushantkumar@gmail.com | LinkedIn | Portfolio

Summary

Full Stack Engineer with 2+ years of experience building scalable web applications, REST APIs, automation tools, and cloud-native systems using Angular, Node.js, TypeScript, SQL, Redis, and AWS. Experienced in frontend development, backend architecture, API integration, infrastructure optimization, and production-grade application development with strong foundations in OOPs, DSA, distributed systems, and system design.

Skills

Languages: TypeScript, JavaScript, Java, Python, SQL, NoSQL
Frontend: Angular, HTML5, CSS3, SCSS, Bootstrap, Responsive Design, RxJS, Angular Material
Backend: Node.js, Express.js, REST APIs, API Design, Microservices
Databases: PostgreSQL, MongoDB, Redis, Firebase
Cloud & DevOps: AWS, Docker, Terraform, Jenkins, CI/CD, Linux, Git
Testing: Selenium, Appium, API Automation, TDD/BDD
Concepts: JWT, OAuth 2.0, Legacy Modernization, Event Driven, State Management
AI Skills: Prompt Engineering, MCP Automation, Copilot, Gemini, Claude, ChatGPT

Experience

Application Development Engineer Jul 2024 – Present
Signify, Bengaluru

- Designed and scaled REST APIs using Node.js and TypeScript for cloud-native applications
- Developed frontend modules and integrated backend APIs for enterprise platforms using Angular
- Modernized legacy application architecture, reducing operational costs by 30% while enabling real-time processing
- Built 5+ internal automation tools improving workflow efficiency and engineering productivity
- Led Agile delivery as Scrum Master, improving sprint execution through planning, stand-ups, and retrospectives

R&D Intern Jul 2023 – Jul 2024
Signify, Bengaluru

- Automated Android and iOS testing using Selenium and Appium, increasing coverage by 100% and reducing manual effort by 50%
- Developed and optimized frontend and backend services for scalable data lake systems
- Managed frontend, backend, and infrastructure for a production-grade data lake platform independently

Projects

Factory Tool Node.js, Angular, REST APIs, AWS Lambda

- Built a secure full-stack platform enabling real-time production data uploads from external factories
- Developed responsive Angular dashboards and backend APIs improving operational efficiency and data consistency

OSS Approval Tool Java, Swing, Maven

- Developed a dependency license comparison tool reducing OSS approval time from 1–2 days to 10–15 minutes
- Improved compliance accuracy through automated dependency extraction and release comparison

Data Lake AWS, Terraform, Node.js, JavaScript

- Optimized infrastructure and backend services, reducing operational costs by 60% and improving reliability by 80%
- Implemented API-level security controls and developed frontend integrations for secure data access

Sr. Architect Angular, Node.js, Docker, Vercel

- Built a full-stack system design simulator to analyze AWS service behavior and scalability bottlenecks
- Developed frontend visualizations to model traffic flow and architectural weaknesses under varying load conditions

Certifications

- Docker Foundations Professional Certificate – Docker
- Generative AI Mastermind – Outskill
- Build AI Agents with Enterprise Databases – Google
- AI Agents Fundamentals – Hugging Face

Achievements

- Employee of the Quarter (Passion for Results) – Q2 2025
- Employee of the Quarter (Customer First) – Q1 2026
- Top 1% Rank in Google PromptWar for building an AI-powered electoral assistance platform
- Holds 4 research publications including IEEE and SSRN journals on cybersecurity and machine learning

Education

Integrated M.Tech & B.Tech in Computer Science and Engineering 2019 – 2024
Lovely Professional University, Punjab
