

Sushant Kumar

Software Engineer

Bengaluru, India | +91-9064005890 | 000sushantkumar@gmail.com | LinkedIn | Portfolio

Summary

Software Engineer with 2+ years of experience developing scalable web applications, RESTful APIs, backend services, automation frameworks, and cloud-native systems. Experienced in full-stack development, infrastructure optimization, legacy modernization, and performance engineering with strong foundations in Object Oriented Programming and Data Structure and Algorithms.

Skills

Languages: TypeScript, JavaScript, Java, Python, SQL, NoSQL

Backend: Node.js, Express.js, RESTful APIs, API Design

Frontend: Angular, HTML5, SCSS/CSS, Bootstrap

Databases: PostgreSQL, MySQL, MongoDB, Redis, Firebase, Data Lake

Cloud & DevOps: AWS, ECS, S3, Docker, Git, CI/CD, Jenkins, Linux, Terraform

Testing & Automation: API Automation, Selenium, Appium (Android/iOS), TDD

Concepts: JWT, OAuth 2.0, Event-Driven Architecture

Specialized Expertise: Cybersecurity, Legacy System Modernization, Cost and Performance Optimization.

Work Experience

Application Development Engineer

Jul 2024 – Present

Signify, Bengaluru

- Led Agile delivery as Scrum Master, improving team velocity through sprint planning, stand-ups, and retrospectives
- Built and scaled high-performance RESTful APIs using Node.js and TypeScript for cloud-native systems
- Modernized legacy architecture, reducing operational costs by 30% while enabling real-time data processing
- Proposed and developed 5+ internal tools to improve engineering productivity and streamline data flow

R&D Intern

Jul 2023 – Jul 2024

Signify, Bengaluru

- Automated Android and iOS UI testing using Appium and Selenium, increasing test coverage by 100% and reducing manual testing effort by 50%
- Developed and optimized backend services for scalable data lake systems, improving performance and reliability
- Managed frontend, backend, and infrastructure for production-grade internal platforms independently

Projects

Factory Tool

Node.js, Angular, REST APIs, AWS Lambda

- Built a secure full-stack platform enabling real-time production data uploads from external factories
- Reduced manual workflow delays by 90% while improving operational efficiency and data consistency

OSS Approval Tool

Java, Swing, Maven

- Developed a dependency license comparison tool reducing OSS approval time from 1–2 days to 10–15 minutes
- Improved compliance accuracy through automated dependency extraction and release comparison

Data Lake

AWS, Terraform, Node.js, JavaScript

- Optimized infrastructure and backend services, reducing operational costs by 60% and improving reliability by 80%
- Implemented API-level security controls and handled maintenance, ownership, and continuous enhancements

Sr. Architect

Angular, Node.js, Docker, Vercel

- Built a system design simulator to analyze AWS service behavior, scalability bottlenecks, and infrastructure costs
- Modeled traffic flow and architectural weaknesses under varying system load conditions

Certifications

- Docker Foundations Professional Certificate – Docker
- Generative AI Mastermind – Outskill
- Build AI Agents with Enterprise Databases – Google
- AI Agents Fundamentals – Hugging Face

Achievements

- Employee of the Quarter (Passion for Results) – Q2 2025
- Employee of the Quarter (Customer First) – Q1 2026
- Top 1% Rank in Google PromptWar for building an AI-powered electoral assistance platform
- Holds 4 research publications including IEEE and SSRN journals on cybersecurity and machine learning

Education

Integrated M.Tech & B.Tech in Computer Science and Engineering

2019 – 2024

Lovely Professional University, Punjab
